Job Vacancy

HOSPITAL ENGINEER

Mater Misericordiae Hospital, a leading healthcare provider in East and Central Africa has an excellent career opportunity. Mater Misericordiae Hospital offers exceptional, compassionate, and Christ-centred healthcare services to our clients through an innovative, engaged, and competent workforce. The successful candidate will fill in the above position:

POSITION SUMMARY:

Reporting to the Chief Operating Officer, the Hospital Engineer is responsible for ensuring continuous plant equipment service and repairs to achieve optimal availability and performance. The role includes ensuring the proper functioning, safety, and smooth operation of all facilities, and carrying out repairs to the required maintenance standards, among other responsibilities.

MAIN DUTIES:

- Overseeing the maintenance and operation of hospital infrastructure, buildings and engineering systems.
- Providing leadership and guidance to all staff in the Maintenance Department.
- Coordinating preventive and corrective maintenance of hospital facilities and equipment.
- Ensuring the uninterrupted availability and reliability of essential hospital utilities, including electricity, water, generators, HVAC systems and medical gas systems.
- Conducting regular inspections to identify engineering defects, operational risks and maintenance requirements.
- Supervising engineering technicians, contractors and service providers.
- Coordinating engineering projects, installations, renovations and infrastructure upgrades.
- Ensuring compliance with statutory requirements, engineering standards, and occupational health and safety regulations.
- Preparing and monitoring engineering maintenance budgets and controlling operational costs.
- Participating in refurbishment committees and overseeing completion of the projects.
- Maintaining accurate engineering records, maintenance schedules and equipment service reports.
- Responding promptly to engineering emergencies and breakdowns to minimise disruption to hospital services.
- Providing technical advice on engineering systems, infrastructure improvements and equipment installations.
- Supporting continuous improvement initiatives to enhance operational efficiency, safety and service delivery.
- Developing and reviewing Bills of Quantities (BOQs) for proposed hospital engineering works, maintenance projects and services to support accurate cost estimation, budgeting and procurement
- Any other duty as may be assigned from time to time.

REQUIRED QUALIFICATIONS

- Bachelor's degree in Mechanical Engineering, Production, Electrical Engineering or Civil Engineering from a recognized institution.
- Registration with the Engineers Board of Kenya (EBK), where applicable.
- At least five (5) years' relevant working experience in engineering operations, facilities management or maintenance.
- Experience working in a hospital or other complex institutional environment will be an added advantage.
- Demonstrated experience in project management, contractor supervision and maintenance planning.
- Good knowledge of occupational health and safety, statutory compliance and engineering standards.

If you are interested in the above position and you meet the requirements listed, please send your application together with a detailed CV, Copies of Academic Certificates, three [3] referees and include their telephone contacts and email addresses to **hrrecruit@materkenya.com**; to reach us not later than 7th **December 2026.**

Only shortlisted candidates will be contacted.

Please note that Mater Misericordiae Hospital does not charge any fee at any stage of our recruitment process.
